Twenty-Two Years Ago

A genial gentleman, somewhat long and lanky, then and now a resident of this village, took an Ordinary Life Policy at age 36 in the Northwestern Mutual Life Insurance Company. He expected to pay premiums on this as long as he lived at the rate of \$27.39 per thousand per year.

He is older now than he was, so he asked me how much paid up insurance he could get on this policy and cease paying premilife for \$1378.00 per thousand and that if he so desired, he could take a paid up annual dividend paying policy for \$1002.00 per thousand and discontinue the payment of premiums

Thus, this Ordinary Life Policy which called for the payment of premiums for life became paid up in 22 years due to the excellent dividends earned thereon.

The slender gentieman alluded to above is still smiling.

Buy Life Insurance This Way-

Consider first-the maximum proportion of your salary available for the purchase of Life Insurance; Second the minimum income that, in decency and self-respect. you would provide for your wife when you are gone.

Necessarily, the older a man is when he buys Life Insurancethe smaller the income his family will receive from the Life Insurance he can afford to buy.

Young men especially, between the ages of 20 and 30, should consider this most carefully. Buy Life Insurance Big, right now, when the proportion of your income available for the purchase of Life Insurance is large, and the premium rate is low. A Premium Savings Account makes Life Insurance easy to buy.
